

FREESTYLE SLALOM TRICKS MATRIX 2026 - All Technical Tricks based on good execution, stability, speed, 4 cones/3 rotations, on 80cm cones line.										
Families-->		OTHERS	SITTING	JUMPING	WHEELING	SPINNING				FOOTWORK
		Do not include sitting, jumping, spinning and wheeling tricks.	Squatting position, with the waist below or on knee level, at all time when performing on the cones.	Both feet should be in the air at the same time.	Tricks that are done in a linear direction, whether frontwards or backwards, and inside the cone line, with only one wheel touching the ground. Lower level tricks have two wheels/one foot/two feet on the ground.	The skater should have at least one wheel touching the ground when spinning and remain inside the cone line during the rotation.				The difficulty, speed and variety of movements performed will lead to a higher technical mark. Basic or simple freestyle footwork will lead to a decrease of the Technical mark.
